Professional Summary

Cloud Engineer and Developer with over 10 years of enterprise technology experience and hands-on experience designing and developing Amazon Connect, Amazon Lex, and AWS serverless solutions for customer engagement and conversational AI use cases. Experience spans Amazon Connect, Amazon Lex, AWS Lambda, DynamoDB, CloudFront, S3, Cognito, Python, JavaScript, HTML, and CSS, with a focus on API integrations, workflow automation, and secure cloud deployment

Core Competencies

- Front-end Web Application Development
- Conversational AI & Chatbot Integration
- REST API & Web Service Integrations
- CRM & Third-Party System Integration
- Responsive UI Development with JavaScript, HTML, & CSS
- Agile Collaboration & Cross-Functional Delivery

Skills

AWS & Cloud Technologies: AWS Lambda, Amazon Connect, Amazon Lex, DynamoDB, Amazon S3, CloudFront, CloudWatch, IAM, CloudFormation, Amazon Cognito, Amazon RDS, AWS SDK (boto3), Serverless Applications

DevOps & Automation: Infrastructure as Code (CloudFormation), Git, GitHub, CI/CD Concepts, Deployment Automation, Version Control, Automated Testing, Cloud Resource Provisioning

APIs & Integrations: REST APIs, API Integrations, Webhooks, JSON, CRM Integrations, Third-Party Platform Integrations, Omnichannel Integrations, AWS SDK (boto3)

Front-End Development: HTML, CSS, JavaScript, Responsive Web Development, Front-End UI Development, Authentication Workflows, Chatbot Integration

Programming Languages: Python, JavaScript, TypeScript, Java

Contact Center Technologies: Amazon Connect, Cisco UCCE, Cisco Finesse, Cisco ECE, IVR Systems, SIP, Omnichannel Routing, Acqueon Cloud

Monitoring & Operations: CloudWatch, ServiceNow, Jira, Incident Management, Operational Support, Troubleshooting, Root Cause Analysis, Application Monitoring, Log Analysis

Databases: DynamoDB, Amazon RDS, Microsoft SQL Server, MySQL

Testing & Developer Tools: VS Code, GitHub, Postman, Pytest, Claude, Amazon Q, GitHub Copilot

Industry Certifications

AWS Certified Cloud Practitioner
March 2026

**Cisco Certified Network Associate
Collaboration (CCNA-C)**
February 2019

Featured Projects

Serverless Customer Engagement Portal with Amazon Lex & Cognito | May 2026

Stack: AWS CloudFront, Amazon S3, Amazon Cognito, Amazon Lex, HTML, CSS, JavaScript

Outcome: Built and deployed a secure cloud-based customer portal that integrates conversational AI, password-less authentication, and responsive front-end functionality to extend the capabilities of an Amazon Connect contact center environment.

- Developed a responsive front-end customer portal that provides authenticated users with access to chatbot support and IT resources
- Integrated an Amazon Lex chatbot into the website to support conversational self-service experiences within the Amazon Connect ecosystem
- Designed and implemented a password-less authentication workflow using Amazon Cognito user pools and app clients with email-based passcode verification
- Configured CloudFront and Amazon S3 for scalable hosting and low-latency delivery of chatbot UI artifacts and static web assets
- Implemented front-end functionality using HTML, CSS, and JavaScript to support authentication flows, chatbot integration, and portal navigation
- Applied AWS cloud best practices for secure deployment, maintainability, and operational reliability across front-end and authentication components

AI-Powered Cloud Contact Center | 2025 - 2026

Stack: Amazon Connect, Amazon Lex, AWS Lambda, DynamoDB, Python, boto3, CloudWatch

Outcome: Engineered a serverless cloud contact center solution with conversational AI, intelligent call routing, backend automation, and API-driven integrations to support scalable customer engagement workflows.

- Developed conversational AI workflows using Amazon Lex, including intent recognition, slot capture, dialog management, and escalation to live agents
- Built serverless backend services in Python using AWS Lambda and boto3 to automate business logic, validate customer data, and integrate with external APIs and backend systems
- Designed dynamic Amazon Connect contact flows with queue-based routing, conditional logic, failover handling, and escalation workflows
- Created DynamoDB data models optimized for high-volume interaction processing within a serverless architecture
- Implemented CloudWatch logging, monitoring, and operational alerting to improve observability, troubleshooting efficiency, and runtime reliability
- Developed automated testing and end-to-end validation workflows to ensure consistent customer interaction experiences across the platform

Professional Experience

Everise | Unified Communications Engineer | Nov 2021 - Jan 2026

- Led Acqueon Cloud and Cisco UCCE integration work to support outbound engagement workflows and contact center operations
- Developed and modified Java-based IVR applications to keep cloud communication services aligned with changing business requirements
- Supported day-to-day contact center operations by troubleshooting agent access issues, routing failures, queue performance concerns, and IVR-related incidents
- Performed user administration activities including account provisioning, permission management, and access troubleshooting across contact center platforms
- Monitored operational health using dashboards, logs, and performance metrics to proactively identify and resolve service issues
- Participated in incident response activities, root cause analysis, and escalation management for production contact center environments
- Created and maintained operational documentation, support procedures, and troubleshooting runbooks for contact center support teams

NCR | Unified Communications Engineer | Apr 2019 - Oct 2021

- Integrated Cisco ECE with Cisco UCCE to support omnichannel engagement across voice, email, and chat channels. Customized HTML and JavaScript components within Cisco ECE to match workflow and interface requirements

- Integrated Google Dialogflow with Cisco UCCE to support conversational AI and automated customer engagement use-cases
- Supported day-to-day contact center operations by troubleshooting call routing, agent availability, queue performance, and omnichannel engagement issues across voice, email, and chat platforms
- Performed administration and support activities for contact center users, routing configurations, queues, and customer interaction workflows to maintain operational stability
- Investigated production incidents using monitoring tools, application logs, and platform diagnostics to identify root causes and restore service availability
- Collaborated with business stakeholders and support teams to implement configuration updates, validate changes, and ensure minimal disruption to contact center operations

Yellow Pages | Voice Network Engineer | Apr 2013 - Jan 2018

- Integrated dashboard and wallboard applications with Cisco Finesse to improve real-time visibility into agent and contact center performance. Developed HTML and JavaScript components to support agent desktop functionality and reporting requirements
- Troubleshoot IVR, call routing, agent desktop, and telephony-related issues while supporting production contact center environments
- Monitored system performance, call volumes, and operational dashboards to identify service degradation and support proactive issue resolution
- Assisted with user access management, contact center configuration updates, and routine maintenance activities following change management procedures
- Partnered with operations, telecom, and application support teams to investigate and resolve customer-impacting incidents

Education

Master of Network & Communications Management, Network Applications

Keller Graduate School of Management, Graduated 2009

Bachelor of Science in Technical Management, Health Information Technology

DeVry University, Graduated 2006
