Summary

Results-driven engineer with extensive experience designing, integrating, and optimizing enterprise voice and contact center solutions, complemented with hands-on development experience. Proven ability to build custom integrations, automate workflows, and design scalable call flows and IVR systems that connect seamlessly with external applications. Proficient at translating business requirements into cloud-ready, highly responsive architectures, with growing expertise in serverless technologies and conversational AI.

Core Skills

Languages: Python, JavaScript, TypeScript
Cloud: AWS (Lambda, S3, Lex, Kendra, CloudFormation, etc.)
Telephony: SIP, IVR systems
Developer: REST API, GitHub, AWS SDK, Pytest
KPIs/Monitoring: CloudWatch, ServiceNow, Jira
Databases: MySQL, DynamoDB

Featured Project

AI-Powered Cloud Contact Center

AWS (Amazon Connect, Lex, Lambda, DynamoDB)

- Designed and developed an end-to-end cloud-based contact center solution using Amazon Connect, Amazon Lex, AWS Lambda (Python, boto3), and DynamoDB
- Build conversational AI workflows for automated customer interactions, including intent recognition, slot capture, and dialog management
- Implemented serverless backend logic using AWS Lambda to handle business processes, API integrations, and data validation
- Designed and integrated NoSQL data models in DynamoDB for efficient storage and retrieval of customer interaction data
- Developed intelligent contact flows in Amazon Connect, including dynamic routing and escalation to live agents
- Created end-to-end test scenarios and automated test scripts to validate system functionality and user journeys
- Configured CloudWatch logging, monitoring, and debugging to improve observability and system reliability

Professional Experience

Unified Communications Engineer, Everise Nov 2021 - Jan 2026

Acqeon Cloud Integration with Cisco Contact Center

- Configured the API integration between Acqeon Cloud and UCCE.
- Refactored Java IVR applications to ensure compatibility with the new solution
- Administered IVR integrations with third-party CRM and payment handlers
- Lead major upgrades and migrations

Unified Communications Engineer, NCR Apr 2019 - Oct 2021

Email and Chat Integration with Cisco Contact Center

- Integrated Cisco ECE with Cisco UCCE to enable an omnichannel solution.

- Configured HTML and JavaScript files to enable functionality and to customize the look and feel of the application to meet company standards
- Collaborated on the development of a proof of concept for integration with Google Dialogflow.
- Assisted with agent development, scripting to integrate the solution, and configured agent profiles, queues, and task flows
- Lead mergers and acquisitions, annual BCP testing, and server certificate management

Voice Network Engineer, Yellow Pages Apr 2013 - Jan 2018

Agent Desktop Integration with Cisco Finesse

- Integrated third-party dashboard and wallboard application with Cisco Finesse (agent desktop, and wallboards for Supervisors).
- Configured the required reports for display on wallboards, and configured HTML and JavaScript files to display custom metrics and to customize the look and feel of the application in the agent desktop to meet company standards

Jabber Deployment

- Designed the templates for Cisco Jabber softphones and user profiles.
- Automated the deployment of over 2000 devices and users.
- Collaborated on an integration of Salesforce CRM with Cisco Finesse
- Created the Jira service portal, developed the ticketing process and documentation

Industry Certifications & Education

AWS Certified Cloud Practitioner

Amazon Connect Fundamentals

Amazon Connect Developer

Master of Network & Communications Management, Network Applications

Keller Graduate School of Management, Graduated 2009

Bachelor of Science in Technical Management, Health Information Technology

DeVry University, Graduated 2006
